Legionella Management Systems L8MS Mange Mobile

Software systems that work hard
so you don't have to.

L8MS-Manage-Mobile

L8MS-Manage-Mobile has been designed to allow simple on-site collection of water system monitoring results without the need for work sheets or record sheets. For clients with large sites or large numbers of smaller sites the reduction in printing can be very significant.

Every task held in L8MS-Manage can be allocated to a responsible person, these tasks can then be selected for transfer to any Android based device (v2.2+). Each user can select the site or sites they wish to complete (using WiFi or Mobile 3G connections) and download the tasks to the device for completion off-line (You seldom get good internet in basements). Once the results have been collected the user goes back on-line to send the information back to L8MS-Manage.

A test specific job sheet for every site!

Each site download contains the exact tasks that require completing for example , a rolling temperature monitoring programme taking you to 1/12th of the total outlets each month but ensuring all are covered within the year. The control limits are also supplied so out of specification results are highlighted in red. This reduces errors and sometimes prompts the immediate correction of the fault where possible.

Keep it simple

Sticking to a small purpose built application that runs on Android devices has allowed many of our clients to provide engineers with a simple phone on contract with very limited addition running costs.

LCA Section 3—Control

L8MS-Manage & Manage-Mobile goes along way to help you demonstrate a system that controls the delivery of service, creates suitable records, identifies out of specification results and raises non-conformities directly available for clients to view and action.

So why do our customers use L8MS-Manage-Mobile?

“...if you collect results on paper they require reviewing to find the poor readings, and then action reports must be raised. L8MS-Mobile does this with no duplication of effort”
